PROFESSIONAL SUMMARY

Software Engineer with experience in **Python, Django, React, PostgreSQL, AWS, Docker, and OpenSearch**. Experienced in developing and debugging web applications, web crawlers, REST APIs, data processing workflows, authentication, and data extraction pipelines. Hands-on experience with **AWS Lambda, Step Functions, S3, ECS/Fargate, AWS Batch, and EventBridge**. Currently learning **AI/LLM engineering, LangChain, LangGraph, prompt engineering, and AI-assisted development**.

TECHNICAL SKILLS

Programming Languages	Python, SQL
Backend	FastAPI, REST APIs, Data Processing, Web Crawling, Data Extraction
Frontend	React.js, HTML5, CSS3
Databases	PostgreSQL, MySQL, OpenSearch
Cloud	AWS
DevOps / Tools	Docker, Git, GitLab, GitHub, Postman, pgAdmin, Visual Studio Code
AI / LLM	Claude Code, LangChain, LangGraph, OpenRouter, Ollama, Prompt Engineering

PROFESSIONAL EXPERIENCE

Software Engineer

Arrk Group

Oct 2025 – Present

Navi Mumbai, Maharashtra

- Develop and maintain **Python-based data processing and web crawling systems** for collecting and processing planning application data from hundreds of council websites.
- Build and maintain event-driven processing workflows using **AWS Lambda, AWS Step Functions, Amazon S3, AWS Batch, Amazon ECS, AWS Fargate, and Amazon EventBridge**.
- Troubleshoot production, integration, and UAT issues using **OpenSearch, PostgreSQL, application logs, and AWS services** to identify root causes and implement fixes.
- Use **PostgreSQL and SQL** to investigate application configuration, schedules, crawler settings, processing status, and data quality issues.
- Contribute to **FastAPI and React** web applications by developing and debugging REST APIs, search and filtering functionality, frontend state management, and authentication flows.
- Troubleshoot **Microsoft SSO, authentication, and session management** issues across frontend and backend applications.
- Use **Git, GitLab, Docker, AWS CLI, Postman, and Visual Studio Code** for development, testing, debugging, code reviews, and deployment workflows.

PROJECTS

AI Data Quality Agent

- Developed an AI-assisted data quality workflow using LLM concepts to identify and analyse potential data-quality issues.
- Explored **LangChain, LangGraph, LLM workflows, prompt engineering, and human-in-the-loop validation**.

Text-to-SQL Application

- Built an experimental natural-language-to-SQL workflow for querying structured datasets.

- Implemented controlled SQL generation concepts with validation and restrictions for safe query execution.

Sustainable Fashion Marketplace

- Built a full-stack e-commerce application with user management, order tracking, and inventory functionality.

EDUCATION

Bachelor of Computer Applications (BCA)

CGPA: 9.76 / 10

KCE's IMR, Jalgaon

2022 – 2025

ACHIEVEMENTS

- Received the **Rising Star Award – Employee of the Month** at **Arrk Group** for performance and contributions to software engineering projects.
- Solved 100+ Data Structures and Algorithms problems on LeetCode using python.
- Secured **1st Prize in C++ Programming** at IIT Fest 2024.
